

**TruGround™ Conductive Primer is a patented Detec Systems product that enables Electronic Leak Detection (ELD) testing when applied directly under the membrane on a non-conductive surface.**

**Provides conductivity for valid ELD testing on Conventional Roof Assemblies**

**Required for ELD testing of black EPDM roofs**

**Compatible with high and low voltage ELD methods**

**Water-based primer**

**Low VOCs**

**Non-corrosive**

**Does not affect adhesion**

**Easily installed with roller or sprayer; Can be pre-applied**

**Dries in approximately 30 minutes**

**5 Gallon pail covers approximately 1250 ft<sup>2</sup>**

**Easily applied to transitions and details where other conductive substrates cannot be used**

**Compatible with fully-adhered, mechanically attached and torch-down membranes**

**Exposed roof assemblies can be electronically tested for the life of the building**
